Language Translation Website

A language translation website for hospitals is available. The Missouri Hospital Association's translation site www.healthtranslations.com includes CDC H1N1 documents in eight different languages.

Searches may be performed by key word(s); language and topic. The site translates the following languages: Arabic, Bosnian, Chinese (simple), Farsi, Russian, Serbian, Spanish and Vietnamese.

Please forward this to administrative, clinical, mental health, infection prevention, patient safety, and preparedness staff that may have need for this language translation resource.
