

Sit Stat: Information Sharing to Support Medical Surge

Iroquois Healthcare Association is inviting CNY hospitals to participate in a pilot project to support patient transfer. The project is voluntary, free, and will be operational November 18 through December 31. This same system is regularly used by more than 100 hospitals in the downstate region to share critical information about operational impacts and needs.

Information relating to bed availability and ability to accept transfers will be displayed on a dashboard (sample below).
