The Business Model Canvas provides a visual representation of the key partners, activities, resources, value proposition, and revenue streams for the program. The canvas is designed to help stakeholders understand the value proposition and key activities of the program, focusing on rapid deployment, unique home-based and virtual-visit interdisciplinary programs that overcome access barriers seen in traditional outpatient programs. The canvas also highlights the importance of buy-in and support, particularly from decision-makers and patients and their caretakers, as well as patient populations such as Post Intensive Care Syndrome patients.
